

I INTERNATIONAL EXHIBITION OF ENERGY AND ENVIRONMENT

II INTERNATIONAL CONGRESS OF ENERGY AND ENVIRONMENT

Lounge of Congresses of Recinto Ferial de Ferrol (FIMO)

The Fundación Axencia Enerxética Provincial of A Coruña (FAEPAC), depending on the Municipality of A Coruña and the Chamber of trade of Ferrol, in its commitment of spreading all the initiatives which are linked to the protection of the environment and to the rational use of the energy, is employed at the preparation of the International Exhibition of Energy and Environment, which will celebrate in FIMO (Ferrol).

Most of **FIEMA's** space will be dedicated to showing the development that the renewable energies have experienced in Galicia in the last years. Thanks to the existence of a normative favorable frame and to the progressive social awareness, these sources have acquired such importance that in 2012 is expected to cover with them up to 95 % of the energetic demand of Galicia.

Another big subject matters of the exhibition will be dedicated to the natural gas, the cleanest fossil fuel, of major economic performance(yield) and with better perspectives of growth in Galicia. In **FIEMA** there will appear the development that has experienced this source(fountain) in the last years, thanks to the creation and improvement of the infrastructures and of the laying(wire) of the general network(net) of distribution.

In **FIEMA** also the current worry about the environment will be reflected and it will turn into another protagonist of this event since, at present, its care and preservation is an increasing worry between the energetic companies, the public administrations and the population in general. In the fair there different companies of waste management will be represented and will show interesting solutions.

In addition, **FIEMA** will dedicate another great area of exhibition to show the different initiatives of energetic efficiency promoted in the Galician community by different public and private entities, as well as to spreading among citizens the existing relation between the energy saving and the preservation of the environment, in order to aware them about decreasing the consumption.

At the same time, **FAEPAC** will organize the **II International Congress of Energy and Environment**.

In a few days we will have more information about these two events in the web page of **FIEMA** (www.fiema.es)
